

# ET Accessories

## Connection Options

straight  
connector

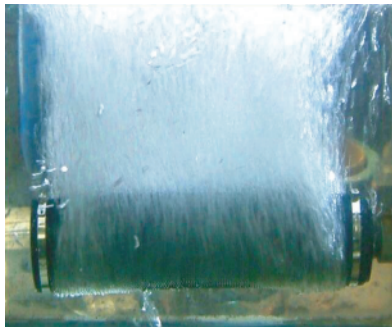

L-shaped  
connector

### Connection Options

All ET pumps are supplied complete with large bore connector for push-fitting tubing to and with a barbed brass connector for use with smaller tubing. In addition to the above we offer straight and L-shaped connectors which are supplied complete with clips to provide a simple connection to the users equipment

Product	Product Code
<b>Straight connector</b>	C01-003
<b>L-shaped connector</b>	C01-002

## Diffusers

### Diffusers

Designed for use in sewage treatment, sludge stabilisation and the aeration of stagnant water these air diffusers are designed for use with the Enviro range of pumps. They are manufactured from high quality EPDM for long service life and multiple fine pore perforation patterns are used to optimize performance and reliability. Diffusers can be specified in either 250mm 500mm or 1000mm.

Product	Product Code
<b>250 mm diffuser</b>	D12-001
<b>500 mm diffuser</b>	D12-002
<b>1000 mm diffuser</b>	D12-003

## Fail safe Alarm

### Fail Safe Alarm

Ideal for use on packaged sewage treatment plants or koi ponds where it is essential to know if a system fails. The low cost alarm provides a bright LED and sonorous buzzer if there is a pressure drop in the system. Incorporating an energy saving design for long service life and can be run by battery or mains supply
